Translation of the original Operating Instructions

Information about these operating instructions

Welcome to OASE Living Water. You made a good choice with the purchase of this product **Aquarius Fountain Set 1000, 1500, 2500, 3500**.

Prior to commissioning the unit, please read the instructions of use carefully and fully familiarise yourself with the unit. Ensure that all work on and with this unit is only carried out in accordance with these instructions.

Adhere to the safety information for the correct and safe use of the unit.

Keep these instructions in a safe place! Please also hand over the instructions when passing the unit on to a new owner.

Symbols used in these instructions

The symbols used in this operating manual have the following meanings:

Risk of injury to persons due to dangerous electrical voltage

This symbol indicates an imminent danger, which can lead to death or severe injuries if the appropriate measures are not taken.

Risk of personal injury caused by a general source of danger

This symbol indicates an imminent danger, which can lead to death or severe injuries if the appropriate measures are not taken.

Important information for trouble-free operation.

Intended use

Aquarius Fountain Set 1000, 1500, 2500, 3500, in the following termed "unit", and all other parts from the delivery scope may be used exclusively as follows:

- For pumping normal pond water for water features and fountains.
- Operation under observance of the technical data.

The following restrictions apply to the unit:

- Do not use in swimming ponds.
- Never use the unit to convey fluids other than water.
- Never run the unit without water.
- Do not use for commercial or industrial purposes.
- Do not use in conjunction with chemicals, foodstuff, easily flammable or explosive substances.
- Do not connect to the domestic water supply.

Safety information

Hazards to persons and assets may emanate from this unit if it is used in an improper manner or not in accordance with its intended use, or if the safety instructions are ignored.

This unit can be used by children from the age of 8 and by persons with physical, sensory or mental impairments or lack of experience and knowledge, as long as they are supervised or instructed on how to use the unit safely and are able to understand the potential hazards. Do not allow children to play with the unit. Do not allow children to clean or maintain the unit without close supervision.

Hazards encountered by the combination of water and electricity

- The combination of water and electricity can lead to death or severe injury from electrocution, if the unit is incorrectly connected or misused.
- Prior to reaching into the water, always switch off the mains voltage to all units used in the water.

Correct electrical installation

- Electrical installations must meet the national regulations and may only be carried out by a qualified electrician.
- A person is regarded as a qualified electrician, if, due to his/her vocational education, knowledge and experience, he or she is capable of and authorised to judge and carry out the work commissioned to him/her. This also includes the recognition of possible hazards and the adherence to the pertinent regional and national standards, rules and regulations.
- For your own safety, please consult a qualified electrician.

GB

- The unit may only be connected when the electrical data of the unit and the power supply coincide. The unit data is to be found on the unit type plate or on the packaging, or in this manual.
- Ensure that the unit is fused for a rated fault current of max. 30 mA by means of a fault current protection device.
- Extension cables and power distributors (e. g. outlet strips) must be suitable for outdoor use.
- Ensure that the power connection cable cross section is not smaller than that of the rubber sheath with the identification H05RN-F. Extension cables must meet DIN VDE 0620.
- Protect the plug connections from moisture.
- Only plug the unit into a correctly fitted socket.

Safe operation

- Never operate the unit if either the electrical cables or the housing are defective!
- Do not carry or pull the unit by its electrical cable.
- Route cords/hoses/lines in a way that they are protected against damage, and ensure that they do not present a tripping obstacle.
- Only open the unit housing or its attendant components, when this is explicitly required in the operating instructions.
- Only execute work on the unit that is described in this manual. If problems cannot be overcome, please contact an authorised customer service point or, when in doubt, the manufacturer.
- Only use original spare parts and accessories for the unit.
- Never carry out technical modifications to the unit.
- The power connection cables cannot be replaced. When the cable is damaged, the unit or the component needs to be disposed of.
- Only operate the unit if no persons are in the water!
- Keep the socket and power plug dry.

Important! The unit is equipped with a permanent magnet. The magnetic field may affect the function of pacemakers.

Installation

Attention! Dangerous electrical voltage.

Possible consequences: Death or severe injury.

Protective measures:

- Prior to reaching into the water, disconnect the power supply to all units used in the water.
- Disconnect the power plug prior to carrying out work on the unit.

Screw T distributor to the connection socket, screw nozzle tube to the T distributor (A1). Screw nozzle mounting and the desired water feature nozzle to the nozzle tube (A2). It is possible to connect a hose to the lateral outlet at the T distributor by means of the reduction element and the stepped hose connection (A3). Place the unit in the pond horizontally on firm, sludge-free ground and ensure that it is completely covered with water (at a maximum of 2 m below the water level).

Align the nozzle tube. The water feature height and the water flow can be adjusted with a regulator at the lateral outlet at the T distributor (B). The power supply must be disconnected to switch off the unit.

Start-up

Attention! Sensitive electrical components.

Possible consequence: The unit will be destroyed.

Protective measure: Do not connect the unit to a dimmable power supply.

Attention! The pump must never run dry.

Possible consequence: The pump will be destroyed.

Protective measure: Check the water level at regular intervals. Always place the unit below water level.

Attention! The installed temperature monitor automatically turns the pump off, if it is overloaded. The pump automatically switches on again once the motor has cooled down. **Risk of accident!**

This is how to connect the power supply:

Switching on: Connect power plug to the socket. The unit switches on immediately when the power connection is established.

Switching off: Disconnect the power plug.

Maintenance and cleaning

Attention! Dangerous electrical voltage.

Possible consequences: Death or severe injury.

Protective measures:

- Prior to reaching into the water, disconnect the power supply to all units used in the water.
- Disconnect the power plug prior to carrying out work on the unit.

If necessary, clean the unit with clear water using a soft brush.

- Never use aggressive cleaning agents or chemical solutions. These could attack the housing surface or impair the function.
- In the event of stubborn furring (calcium deposits), a common household cleaner free from vinegar and chlorine can be used. Subsequently, clean the pump thoroughly using clear water.

Cleaning the unit

Unscrew the nozzle tube including T distributor and connection socket (C1). Open strainer casing and remove pump (C2). Unscrew pump lid and remove impeller (C3). Clean all components using clear water and a brush. After cleaning the pump, reassemble in the reverse order. Insert pump in the strainer casing (C4). Route connection cable such that it cannot be pinched. Refit strainer lid and close (C5).

Remedy of faults

Malfunction	Cause	Remedy
The unit is not operating	No mains voltage	Check mains voltage
Insufficient delivery rate	Impeller blocked	Clean impeller
	Strainer casing clogged	Clean strainer casing
	Excessive pressure losses in the hoses	Reduce hose length and connecting parts to a minimum, route hoses as straight as possible
Unit switches off after a short running period	Water temperature too high	Note maximum water temperature of +35 °C

Disposal

Do not dispose of this unit with domestic waste! For disposal purposes, please use the return system provided. Disable the unit beforehand by cutting off the cables.

Storage/Over-wintering

Remove the unit at temperatures below zero degrees centigrade. Thoroughly clean and check the unit for damage.

Store the unit immersed in water or filled with water in a frost-free place. Do not flood the power plug!

Repair

A damaged unit cannot be repaired and must be put out of operation. Dispose of the unit in accordance with the regulations.

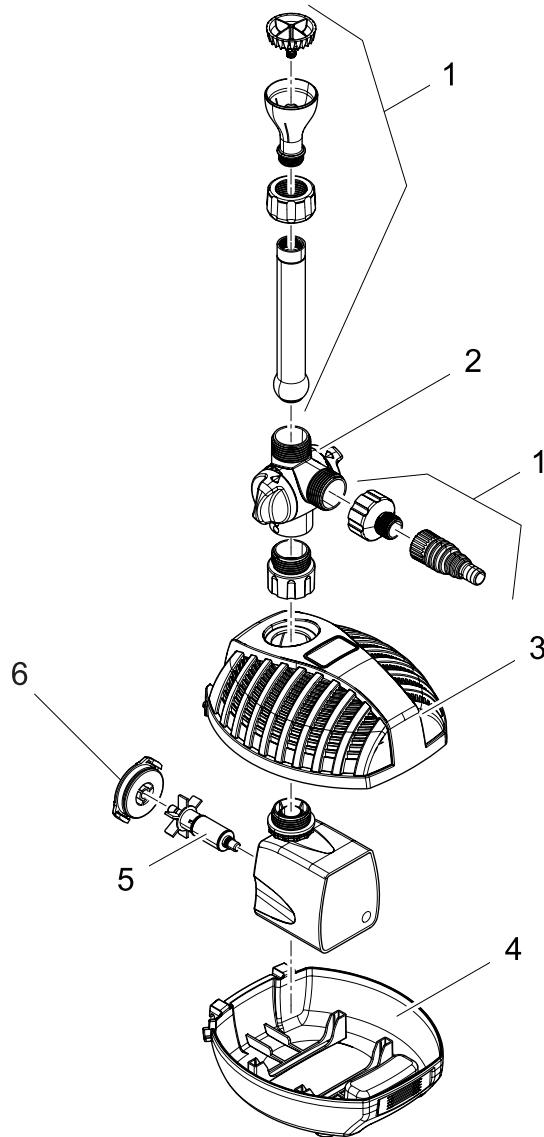

Wear parts

The impeller unit is a wearing part and does not fall under the warranty.
